

## Job Vacancy

<b>Position Title:</b>	Broadcast Engineer
<b>Department:</b>	Chello Benelux
<b>Location:</b>	Amsterdam
<b>Salary:</b>	Competitive & Excellent benefits
<b>Contract:</b>	Definite

Chellomedia Benelux is the leading supplier of Premium channels to the Dutch TV market, distributing its premium pay TV channels Film1 and Sport1 to cable networks and other platforms. It also runs the Digital Media Centre (DMC) in Amsterdam, which provides a full range of broadcast services for channel production, origination and distribution, as well as play out and propagation for several name brand third party channels.

### Purpose Statement

The Broadcast Engineer will support senior staff to ensure flawless operation of chellomedia Programming BV's technical broadcast systems.

The Engineer will follow-up necessary actions, plans and support projects to ensure present and future operability and reliability of these systems.

### Main Responsibilities

- Carries-out the day to day operation including but not limited to preventive and corrective maintenance of all technical broadcast and related systems of the facility as described afore in order to meet agreed availability figures and deadlines.
- Follow-up with associated departments, clients, suppliers and vendors to ensure maximum efficiency of systems applied.
- Supports and works on projects that contain systems mentioned.
- Responsible to meet deadlines, awareness of budget limitations.
- Reports on system availability and performance, system upgrades, issues/follows-up error reports etc.
- Guides, instruct and educate Junior Engineers.

### Knowledge, Skills & Experience

- A HTS level of thinking and acting or MTS level with proven record of working on HTS level.
- 4-5 years operational experience in the maintenance of digital video and audio systems including DVB compression, multiplexing, monitoring and other systems typically found in a technologically advanced broadcast facility.
- Ability to work both independently and cooperatively.
- Ability to understand and respect hierarchical and client/supplier relations.
- Team player with strong organizing skills.
- Ability to communicate and interact within different circumstances where English and Dutch are the main languages used.
- Demonstrated skills in troubleshooting and logic analysis, problem solving and ability to work in and meet with project requirements.
- Able to clearly communicate with suppliers on error-analysis.
